

11/16/21 Analysis Team

Attendees: Mary, Phil, Sean, Matt, Natalie, Aubin

- Surveys
 - Sean will summarize all info in 1 sheet
 - Most critical threats
 - Geography
 - Are there commonalities in cost layers?
 - Mary will add new 5 to species specific sheets and let everyone know when they are updated
 - 5-7 responses per each feature would be acceptable (as long as it spans the geography)
 - Next Step:
 - Natalie will send surveys to additional experts once Mary sends Natalie a "good-to go" email
 - Start crafting what cost layers could look like
 - All - Dec 7th - report out on the features we've been working on
- Kathy Zeller
 - Presented to the tech team - Sean and Kathy had a second call to go over comments on her work - haven't heard back on Crown connectivity work
 - Even preliminary data could readily work into a cost layer, but probably not for our aquatic species
- Social, Cultural, and Economic team
 - Sean sent out a draft to the SCE team - asked them to provide feedback on candidate features - received no responses
 - Phil can circle back with Nanette about joining SCE team
 - Need to get more feedback from folks on this document
 - Natalie see if people can meet right after thanksgiving, take look at document, provide feedback in anyway
