Analysis Team Meeting Notes 10-3-23

Attendees

- Sean
- Mary
- Phil
- Danie
- Maddy
- Aubin

Proofread of chapters!

- Grassland, shrubland, riparian, and two trout species
- Sean and Mary working on intro and methods
    - Should have 90% of info for written report by end of next week
- Sean sent PowerPoint for reference
- Download file from Box and use desktop Word
- Ask Sean about when we're finishing this ****
- Review:
    - Phil – aquatics and grizzly
    - Danie – wetlands
    - Mary – elk and mule deer
    - Maddy – forest and Whitebark
    - Sean – wolverine and riparian
    - Aubin – lynx

Updates

- Danie and Phil
    - Salmonids
        - Flow reference updated
            - Won't work as well for WS cutthroat trout – not as big of a threat
        - Scores good to go
            - Temp., flow, flooding, and invasives
        - Debating on deleting a threat or not
            - Reason for including would be both are salmonids
            - Reason for not including – not as big of a threat for WS cutthroat

Process steps

- Raster or vector data layer for each threat that are scored
    - Worst scored 10,000
    - Best is scored 0
- Sean inputs into planning units layer

- Adds planning layer to Marxan
