

LCD A team

May 2, 2023

Attendees: Bailie, Mary, Sean, Danie, Phil, Natalie

- Native Salmonids
  - Sean will draft out a native salmonids package - Danie and phil could help fill in gaps
    - Bar charts with relative effect
    - Climate change - somewhat integrated into flow
    - sensitivity/risk map - had compiled this map already; compiles raw threat data
      - Could we get access to this data?
  - Take Aways
    - There are Variations in threats across the crown
    - There was excitement for people to gather!
- AGOL
  - Is this LCD or CMP?
    - Show optimization where efforts have been done, where it should be done, and where it is planned
    - There is stuff we can do pre-funding - build the framework piece by piece
  - Need to develop and needs are requirements document before actually creating something
    - Linh will do this > send to natalie for review > send to rest of the team > send to the SC
  - GIS
    - CSKT - Mike Durglo's contact
    - USFS - Linh's climate intern, could use AGOL portal
  - Where will this live longterm and where will it be maintained longterm?
    - USFWS hosting in the early stages, but where will it be transferred after that? - Matt is the key brain on this!
    - Should CMP purchase a license to house all of this?
- Literature to help guide us
  - <https://fosonline.org/pathways/>
    - There are webinars as well!
  - <https://islandpress.org/books/pathways-success>
