8/17/21 LCD: Analysis Team
Attendees: Mary, Phil, Sean, Aubin, Natalie, Erin

Social, Cultural, Economic team
- Meeting will be August 31st at 11am

Conceptual models
- Sean is working on sprucing them up and standardizing them
- Shrubland, grassland, aquatic and riparian - should be coming along in the next week or so
    - Definition for riparian - the terrestrial and near shore vegetation communities - what is happening above the water - also include groundwater and surface water interactions; wetlands and aquatic = in the water
        - Erin will provide feedback on aquatic, wetland, and salmonids conceptual models - Sean will send a powerpoint with all the conceptual models
    - Phil will export his models on Miradi
    - If you have time, look over the Miradi tutorial at the top of the program screen

Website
- Individual pages for each focal feature
    - Marxan maps, conceptual model
    - Does not yet include the Social and cultural features - might be good to include a placeholder to note that we are working on it
        - Landscape features> ecological features (coarse and fine) and social, cultural, & economic features
        - Mary will explore the option of creating anchors on the landscape feature page
        - Natalie will send the flickr account to all
- Process:
    - Once it is posted, the A team will review
    - Then, we will promote the website to leadership team and roundtable - can do a walk through on next week's leadership team call

Roundtable
- Roundtable wants to feature LCD in their annual conference - likely about 1.5 hrs to present
    - Would be good to have different voices
- Things to ensure: that the LCD content is not redundant at the CMP and RT forums; flag early on in discussions what the CMP role on the landscape is; make it clear that CMP is the LCD convener

Survey Monkey
- Intent: open up conversation with Subject matter experts
- It will take about 15 minutes

- Many of the folks this survey will be sent to are people sean has communicated with in the past
  - How do we make this look exciting in people's inbox??
  - Have agency leads to prompt staff to complete the survey
- Natalie, Mary, and Sean will create the feature specific surveys
