

LCD Meeting, February 20th, 2024

Participants

Sean Finn
Bailie Eikill
Mary McFadzen
Maddy Eagle
Danie Frevola
Soleil Osgood

Position Descriptions

- Sean sent them to the full CMP steering committee to be reviewed
- Look through them one more time
- How will funds flow from ATB to the contractors?
- Check out Factor Descriptions section
- Edit in the word doc that Sean sent out on Friday (rather than the Box document)

Work Plans

- Next step is the Work Plan
- Position descriptions lead into the LCD project work plan (for the next 2 years)
- Public facing workplan- big picture that describes where we were and what we plan to do over next 2 years
 - Strategic designs
 - Redesigning spatial designs
 - Workshops
- Includes draft visuals
- Includes rough timelines and expected outcomes, etc.
- This will be posted to the website- maybe even have a separate page to follow the unfolding story (Story map of the story that hasn't unfolded yet? Video of Sean explaining the LCD story?)

Group thoughts

- Danie has been slowly working on Metadata. All WBPI metadata should be good to go soon
- Unavailable data question → Bailie provided an example of how to list that:
<https://www.sciencebase.gov/catalog/item/654a892fd34ee4b6e05c272b>
<https://www.sciencebase.gov/catalog/item/655bdfadd34ee4b6e05cc17e>
- Contact List
 - Going forward there should be more interest in the LCD from the public, so we will need to have a contact list for all those people
 - Sean gave a presentation last week, and had someone reach out who wants to be involved- how do we document this?
 - Working groups: Do we get in contact with those people for phase 3 workshops?
 - We can pull data from Expert Results Survey to put into the master contact list

Documenting Metrics

- Deliverable for ATB: certain amount of outreach
- We need to think about how we can efficiently achieve this
- We need to document how much outreach we have done → Ex: Sean gave webinar last week, so we need to keep track of that information somewhere

Workshops

- How will we pair up multiple features?

- Each one of us (AT) will be the lead person on one of these workshops as a work team to foster the workshop
- We will start thinking about this more as we craft the Work Plans

Bulltrout
WS Cutthroat Trout

Mule Deer
Rocky Mt. Elk

Wetland
Water (Aquatic)

Forest
Riparian

Canada lynx
Wolverine
Grizzly Bear
