- Phil Matson
- Soleil Osgood
- Maddy Eagle
- Aubin Douglas

Any follow up needed on the Phase 3 Work Plan and the contractor Work Plans – what is missing, unclear or just wrong?

- Looks good, way to go Sean!

General questions/confusion on the Phase 3 process

- Question for Sean for ATB grant contracting- how many phases are there? 3 or technically 4?

Continue the conversation about Workshop assignments, etc.

- Confusion about feature pairings
 - Aquatics / water → are those paired together, or paired with riparian?
 - Riparian / wetland, or is wetland its own overarching thing?
 - Riparian + wetland would make sense, but then forest would have to go with something else
 - We have not yet convened with any wetland experts
 - Wetland / riparian / aquatic → can these all go together?
- Brainstorm of updated pairings as well as **Lead** and **Co-Lead**
- Bull trout / WS cutthroat Trout (**Sean**) (**Phil**)
- Ecological Connectivity (**Sean**) (**Aubin**)
- Mule Deer / Rocky Mt Elk (**Maddy**) (x)
- Canada Lynx / Wolverine (**Phil**) (x)
- Shrublands / Grasslands (x) (**Aubin**)
- Aquatics / Water (**Phil**) (**Bailie**)
- Riparian / Wetland (**Danie**) (x)
- Forest / Whitebark Pine (**Maddy**) (x)
- Grizzly Bear (Bailie) (**Mary**)
- Social, Cultural, Economic (**Maddy**) (x)
 - Bailie will send out the updated pairing excel via email
 - Idea- have a Lead and Co-Lead, but only 1 person needs to be present at the workshop in person.

Any issues or challenges to preparing data & posting to ScienceBase.

- Metadata- Phil received an error with the mdJSON for the Links habitat suitability
 - Unsure what the issue is, but Bailie will chat with Matt to try to resolve it (seems like it is an MD editor issue)

Do folks going to the Forum need anything from those not going?

- Map → Map to put pins in to show locations, or something along those lines
- Erin was going to look for LCD map at the bio station (in Erin or Danie's office?)
- QR code that leads to the LCD website (the poster has one)
- Make a QR code that links to the LCD sign up- aim at people interested in workshops
- List off the workshops at the forum and try to get contact info for people who may be interested

Other

- Milestones (in the phase 3 work plan appendix) → things will start getting busy in April. Once the ATB grant funds start coming things will pick up for the LCD
 - When will we expect to start getting funds? Not totally sure, but likely around June
- Have we been talking to potential candidates for the contractor positions? No
- Individual responsibilities
 - Can we go over and clarify these?
